

## Kent Expert Witness

case study

Client:  
Private

Main Contractor:  
Artemis Green/Burslem

Stones Used:  
Crema Marfil

Value:  
£ 500,000

Completed:  
October 2014

Services Provided:  
Survey and expert report, material specification, installation methodology, on site quality control

This private client had 850m<sup>2</sup> of Crema Marfil limestone paving installed over two levels on the terrace of his £3m residence in Kent.

Initially the client contacted The Stone Consultants to provide an independent, expert report on the quality of the finish, requiring confirmation the tiling conformed to the current British and European Standards for natural stone flooring.

Following an extensive survey, which included analysis of cores taken from the concrete slab beneath the tiling, The Stone Consultants provided a factual and robust report, which the client used to seek redress from the original contractor.

Unfortunately, the terrace had to be condemned and re-built. The client asked The Stone Consultants provided a detailed specification for the supply and installation of new tiling for the new terrace. In addition, The Stone Consultants took on the role of Contract Administrator for the whole project, providing final sign off for the works.
